

# Stretching and Shrinking Practice Answers

## Investigation 1 Additional Practice

- Answers will vary. Possible answers: 6 by 8, 9 by 12, 4.5 by 6.
  - Answers will vary. Possible answers: 1.5 by 2, 1 by 1.33.
  - Answers will vary. Possible answer: 3 by 5.

2.

Angle
A
B
C
D
E

corresponds to

Angle
V
W
X
Y
Z

Side
AB
BC
CD
DE
EA

corresponds to

Side
VW
WX
XY
YZ
ZV

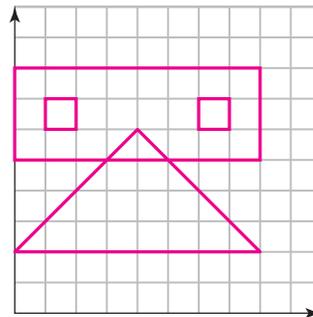

- Check students' drawings; 4 copies
  - This will be true for any two such squares. Two copies of the smaller square will fit side-by-side in the larger square. Two of these rows can fit vertically in the larger square, for a total of four squares.
- The sides of the original quadrilateral measure 2 cm and 3 cm. The sides of the image measure 0.6 cm and 0.9 cm. 0.6 is 30% of 2 and 0.9 is 30% of 3. Carl entered 30% into the photocopier.
  - Amy's image is a quadrilateral similar to the original, with side lengths 5 cm and 7.5 cm.
- Angle A is corresponding to angle U. Angle C is congruent to angle W. Side DE corresponds to side XY.
- $\frac{10}{16}, \frac{15}{24}, 0.625$
- $92 \times 0.30 = 27.6$  or  $0.30 \times 92 = 27.6$

## Skill: Using Percent

- |        |       |        |
|--------|-------|--------|
| 1. 112 | 2. 84 | 3. 4.5 |
| 4. 28  | 5. 20 | 6. 40  |
| 7. 80  | 8. 4  | 9. 150 |

## Investigation 2 Additional Practice

- 9 copies will fit.
  - This will be true for any two such rectangles. Three copies of the smaller rectangle will fit side by side in the larger rectangle. Three of these rows can fit vertically in the larger rectangle, for a total of nine rectangles.
- The original figure is below:

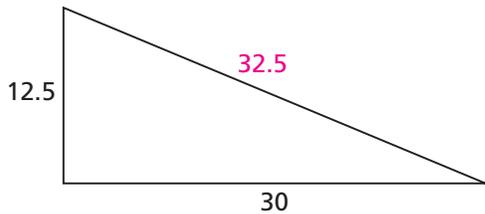

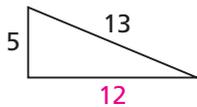

- The angles would have the same measure. The sides of the image will be six times as long as the sides of the original. The image would be similar to the original, because angle measures are the same and all sides grew by a scale factor of 6.
  - The image would be similar to the original, because angles have the same measure and the sides grew by the same scale factor of 3.
- The scale factor from Zug to Mug is  $\frac{1}{2}$ . All of the side lengths of Mug are  $\frac{1}{2}$  as long as the side lengths of Zug.
  - Wendy is correct. The side lengths of her new "Wump 8" are 4 times as long as the side lengths of Zug.

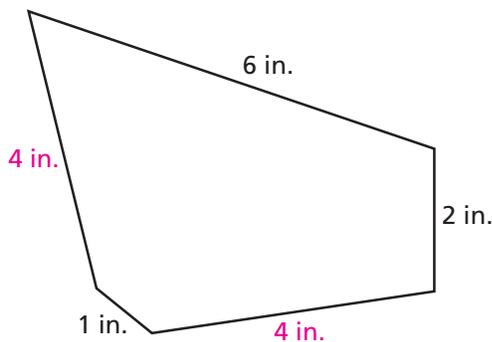

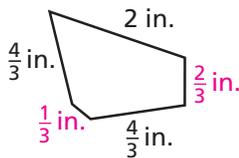

# Stretching and Shrinking Practice Answers

6.

7.

8. 2; 2

9. 16

## Skill: Similar Polygons

1. 4

2. 12

3.  $\frac{8^4}{7}$

4.  $x = 12; y = 13\frac{1}{3}$

5. 2.5

6. 10

## Skill: Fractions, Decimals, and Percents

1–12. Two possible answers are given.

1.  $\frac{6}{20}, \frac{9}{30}$

2.  $\frac{14}{16}, \frac{21}{24}$

3.  $\frac{10}{12}, \frac{15}{18}$

4.  $\frac{6}{8}, \frac{9}{12}$

5.  $\frac{3}{4}, \frac{6}{8}$

6.  $\frac{2}{3}, \frac{4}{6}$

7.  $\frac{1}{3}, \frac{3}{9}$

8.  $\frac{1}{4}, \frac{2}{8}$

9. 0.6; 60%

10. 0.7; 70%

11. 0.52; 52%

12. 0.85; 85%

## Investigation 4 Additional Practice

- There are two possible answers. The first possibility is that Rachel was thinking about the scale factor from the larger triangle to the smaller triangle. The second possibility is that she was thinking about the ratio of the shorter given side of each triangle to the longer given side.
  - In this case, Rachel had to be thinking about the ratio of the longer given side to the shorter given side. Depending on students' answers to 1a, this could be the same or it could be different thinking.
- $a = 10$  centimeters
  - $b = 1.25$  centimeters,  $c = 6$  centimeters
  - $d = 3.75$  centimeters,  $e = 7.5$  centimeters
- $x = 4$  centimeters
  - $y = 24$  centimeters
- 12 cm
- ABCD is similar to EFGH. Side DC corresponds to side HG. The ratio of side AB to side AD is the same as the ratio of side EF to side EH.
- corresponding; 6; 6; 2

## Skill: Similarity and Ratios

- yes;  $ABCD \sim EFGH$
- no
- yes;  $\triangle STU \sim \triangle VWX$
- yes;  $\triangle DEF \sim \triangle CAB$
- yes;  $GHIJ \sim KLMN$
- no
- $x = 4\frac{2}{3}; y = 8$
- $x = 18; y = 24$
- $x = 21; y = 24$
- $x = 20; y = 9$
- $x = 21\frac{3}{5}; y = 20$
